# Worksheet guideline

## Access the calculator

- Visit Cafe Astrology's Free Natal Chart Report page: [Cafe Astrology](#)
- Enter birth details for each family member and note the results
- The generated report will display your Sun, Moon, and Ascendant signs, including their exact degrees

## Fill in the worksheet

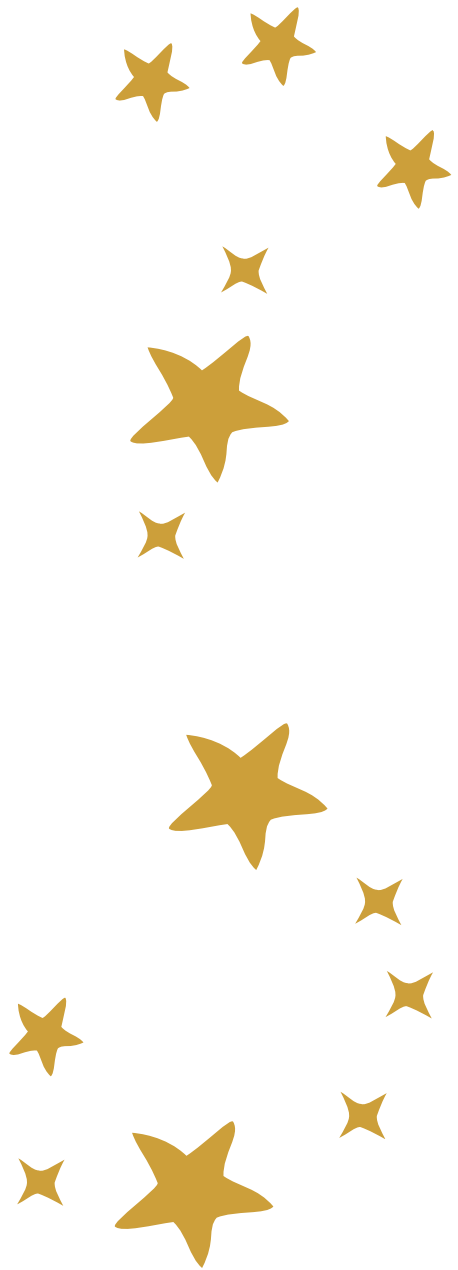

- Take each family members astro information and enter into the worksheet
- Take the stated degree for the sun, moon and ascendant.
- Add the accumulated degree described in the zodiac signs degrees box above
- If for example 12 degrees pisces sun - add 330 degrees to 12 = 342 degrees

## Calculate family composites

- Sum up the accumulated degrees for the sun, moon and ascendant
- Divide the total amounts with number of family members
- You now have your family composite sun, moon and ascendant

## How to interpret the results

- Astro.com offers empty downloadable wheels to use to enter results
- Do web searches for interpretations of composite sun, moon and ascendant for more information
- Check out myastrosite.com post on family dynamics
- Play around and have fun!!!
